Bundle complete! 28 Gemfile dependencies, 53 gems now installed.  
Gems in the groups development, test and sqlite were not installed.  
Use `bundle info [gemname]` to see where a bundled gem is installed.  
Post-install message from rdoc:  
Depending on your version of ruby, you may need to install ruby rdoc/ri data:

<= 1.8.6 : unsupported  
= 1.8.7 : gem install rdoc-data; rdoc-data --install  
= 1.9.1 : gem install rdoc-data; rdoc-data --install  
>= 1.9.2 : nothing to do! Yay!  
Post-install message from mysql2:

=====

You've installed the binary version of mysql2.  
It was built using MySQL Connector/C version 6.1.5.  
It's recommended to use the exact same version to avoid potential issues.

At the time of building this gem, the necessary DLL files were retrieved from:

<http://cdn.mysql.com/Downloads/Connector-C/mysql-connector-c-6.1.5-win32.zip>

This gem \*includes\* vendor/libmysql.dll with redistribution notice in vendor/README.

=====

Post-install message from rmagick:  
Please report any bugs. See [https://github.com/gemhome/rmagick/compare/RMagick\\_2-13-2...master](https://github.com/gemhome/rmagick/compare/RMagick_2-13-2...master) and <https://github.com/rmagick/rmagick/issues/18>
